Professional Summary

Software Engineer with experience in backend development and RESTful API design.Skilled in Go, Python, databases, and collaborative software development.Hands-on experience building practical software solutions and backend systems. Developed projects focused on accessibility, resource matching, and user-centered solutions. Growing expertise in machine learning, data analysis, and artificial intelligence.Passionate about building reliable, practical, and impactful technology solutions.

Technical Skills

Languages: Go, Python, SQL
Infrastructure and tools: Git, Github, Linux, Render
Frameworks: Gin

Projects

IRIS – Adaptive Accessibility Companion : IRIS landing page
Go, MySQL, REST APIs, OpenAPI, HTML, CSS, JavaScript

- Built a personalized accessibility platform supporting 4+ accessibility preferences, including text-to-speech, high contrast, dyslexia-friendly fonts, and simplified layouts.
- Designed a 4-table MySQL database for users, preferences, health services, and user events.
- Developed Go-based REST APIs for managing user preferences and resource-matching functionality.
- Documented API endpoints and data structures using OpenAPI.

Work Experience

Software engineer Zone01 Kisumu

- Building Go-based microservices and CLI tools using standard libraries.
- Practicing clean code reviews, containerization, and Git workflows.

ICT intern - County Government of Kisumu

- Provided technical support and maintained LAN infrastructure.
- Resolved hardware/software issues and network bottlenecks.
- Improved ICT response time and ticket resolution efficiency.

Education - Kisii University - Bachelor of Software Engineering
